The skis that rock!

M.O.D.S.

MODULAR OBJECT DYNAMIC SKIS

M.O.D.S. are a revolutionary design in snowmobile skis. We aren't talking just another lightweight plastic ski, we are talking a complete modular, dynamic ski with possibilities yet to be imagined, and we can imagine quite a lot.

M.O.D.S. or Modular Object Dynamic Skis start with a U.H.M.W. material, well known in the snowmobile industry and especially for skis, but we compression mold them with a patented feature only found on M.O.D.S. - a replaceable center keel! We didn't stop there, M.O.D.S. also have a flexible loop handles and come with mounting hardware for all of the popular late model sleds. Done with a brand "A" sled and buying brand "B"? Take your M.O.D.S. with you, the mounting hardware is already included! Plus, M.O.D.S. come with a set of Dominator wearbars with 6" of carbide. M.O.D.S. use a common Dominator or Aggressor wearbar (Arctic Cat® pattern) found at any Arctic Cat® dealer.

Ok, all those included items are great, but what makes these skis awesome? Not our choice of colors, not our plain-jane looks, not our great price, but the features found together only on M.O.D.S. Features like control ribs to reduce darting, a flexible design that reduces shock felt through the handlebars and the ONLY ski with a replaceable keel that allows flexible tuning.

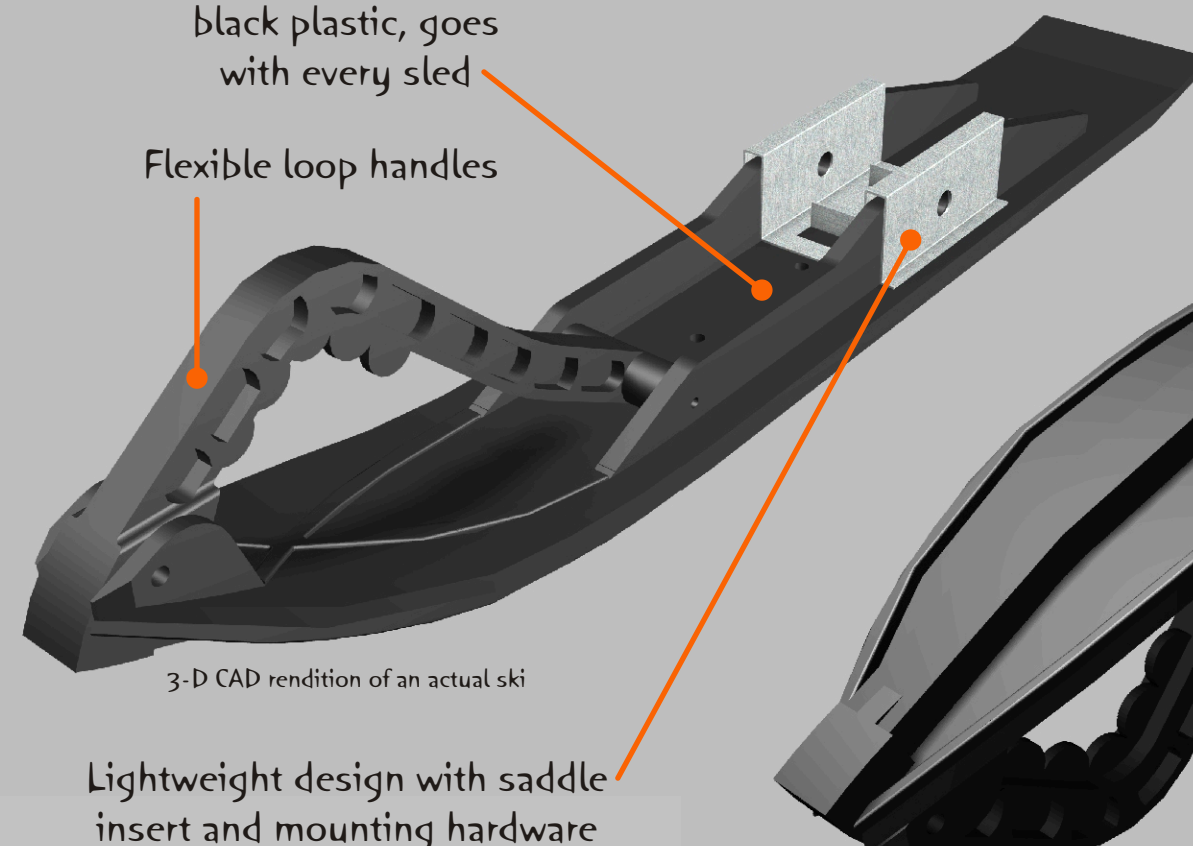

Want more bite on the race track? Get the aggressive keel profile. Want more control with less darting on the trails? Use the standard square keel. More tuning keels are in the works, so the possibilities could be endless. M.O.D.S. are flexible, M.O.D.S. are great, and best of all, the M.O.D.S. you get today will be able to accept future profiles and parts!

Flexible in extreme conditions and offers less shock through handlebars

U.H.M.W. fade-resistant black plastic, goes with every sled

Flexible loop handles

3-D CAD rendition of an actual ski

Lightweight design with saddle insert and mounting hardware for all popular models and brands included with each set!

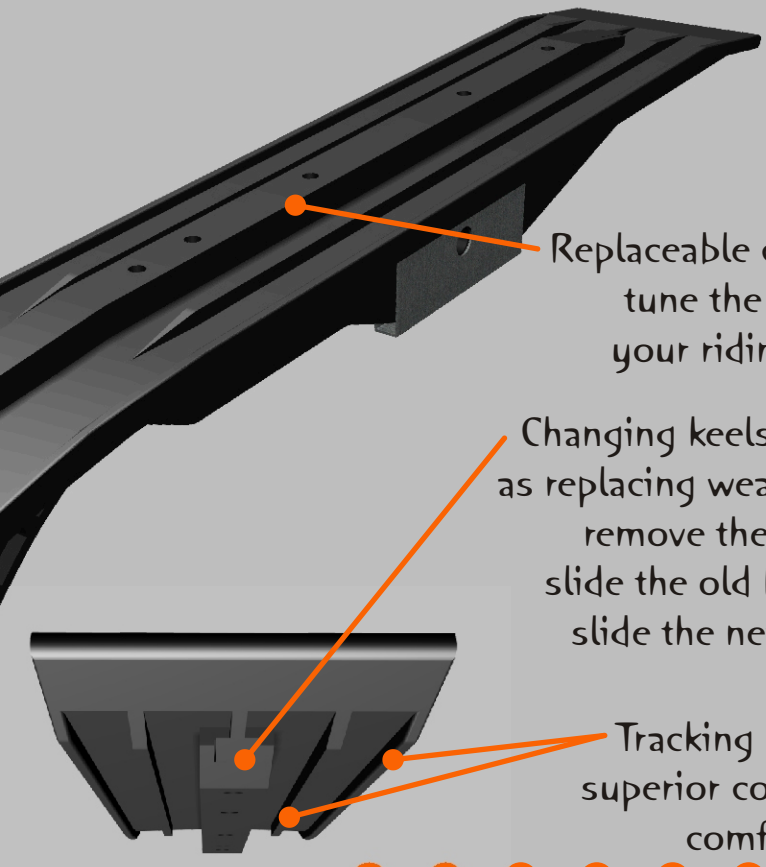

Only \$299.95 complete

- 2 skis
- 2 standard center keels
- 2 Dominator wearbars (6" carbide)
- 2 standard ski loops
- Mounting hardware for all popular brands

Tired of the same old plastic skis?
Are they all starting to look the same?
Are you getting the performance or tuning you expected?

If you answered "I don't know" to any of these questions, then you're a sure candidate for

M.O.D.S.

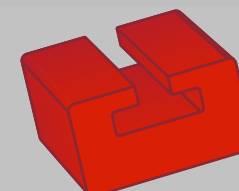

Replaceable center keel, tune the ski for your riding style

Changing keels is as simple as replacing wearbars. Simply remove the wearbar, slide the old keel off and slide the new one on.

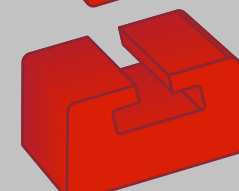

Tracking ribs for superior control and comfort

Available Keel Profiles

Standard

Aggressive

Keels available in Red, Blue, Green, and Yellow

M.O.D.S. are skis you can keep and tune for a long, long time. Don't be left in the snow dust, M.O.D.S. your sled today!
